

OUR MOVEMENT TO A MORE SUSTAINABLE FUTURE.

At Mövenpick, we take great pleasure in fostering a more sustainable future of travel by nourishing the people and nature this world has to offer. Take part in our movement to sustainability by adopting these steps into your daily recipe:

- I am ripe with ways to enlighten our guests about our sustainability approach and practices, and I look forward to the opportunities to do so.
- Ensuring comfort doesn't include the excessive use of the heater and air conditioning. When I do use the heater and air conditioning, I do my best to limit the loss of hot and cool air by keeping my windows and doors closed.
- I make sure the lights and all other electrical equipment and appliances are turned off before I leave a room.
- I reserve the use of hot or warm water for the times I need it most. I do my best to only use the dishwasher and laundry machines when they are full.

We are proud of our sustainability commitments, which include pairing with Green Globe in being sustainably certified. By pairing with Green Globe, who is aware of our voluntary commitment to the promotion of life through each and every guest's stay, we happily satisfy a set of stringent requirements. This includes routine on-site audits, which are verified by an independent auditor or independent jury of environmental experts and tourist professionals. Despite it being a demanding process, we take great pride in this process of betterment. For more information about Green Globe, please visit www.greenglobe.com

Towards sustainable hospitality.
